SUBJECT INDEX TO VOLUME 7

This index lists titles of articles and notes together with the names of their authors. Classification is based upon analyses of contents of the aritcles rather than upon the titles alone.

Apparatus, Demonstration
Apparatus, Laboratory
Astronomy and Astrophysics
Atomic and Molecular Physics
Awards
Biophysics
Book and Film Lists
Book and Film Reviews
Centripetal Force (see Mechanics, Classical)
Computers
Courses
Crystals (see Solid State Physics)
Editorials
Education
Electricity and Magnetism
Electronics
Examinations (see Testing)
Films
Fundamental Particles
Geophysics
Gravitation
Harvard Project Physics (see Courses)
History and Biography
International Physics Education
Light
Mathematics
Measurement
Mechanics
Multi-Media Aids
Nuclear Physics
Optics (see Light)
Particles
Physics Courses (see Courses)
Physics and Society
Projection Pointers
PSSC (see Courses)
Publications
Quantum Mechanics
Radioactivity
Solid State Physics
Sound
Testing
Waves

Apparatus, Demonstration

Bernoulli's Principle on a Grand Scale, Glenn F. Powers—116
Binary Stars and Light Curves, Alan L. Breitler—453
Boiling Point of Water Variation with External Pressure, Zenon Gubanski—247
A Comparative Evaluation of He-Ne Lasers, Tung H. Jeong—181
Demonstration of Beats With a Ripple Tank, Jack L. Smith—456
Demonstrations in Physics from Oceanography and Meteorology, K. L. Warsh—327
Dispersion and Inversion, Samuel Hirschman—116
Electrostatics Demonstrations, Robert P. Lanni—513
An Experience in Observation, Merle Fisher—166
Large Scale Demonstration of the Minimum Angle of Deviation, Wallace A. Hilton—513
Longitudinal Standing Waves on the Overhead Projector, Harald C. Jensen—115
Making an Electric Field Visible with $KMnO_4$ Crystals, Michael Bernstein—301
Oscilloscope Display of Current-Voltage Curves, M. Camden—406
Preferential Discharge of Negatively Charged Bodies by Certain Incandescent Wires or, The Case of the Overachieving Quanta, Richard S. Siegel—226
Projected Plum Pudding or a Thomson Model Model, Francis S. Lestingi—346
The Psychedelic Student-Getter, William R. Franklin—227
Range of a Projectile, Alfred M. Eich, Jr.—116
Rocket Engine Analog, Robert F. Coutts—407
Seeing the Science of Sound, Brother Shamus Mahoney—246
Sound on a Light Beam, William Zeitz and Terrence F. Toepker—301
Space Spectacular, Stuart L. Dattner—310
Spectacular Bubbles, Marvin Ohriner—456
Two-Source Interference Transparency, David P. Koch—103

Apparatus, Laboratory

Additional Suggestions for Repairing Thermometers with Split Mercury Columns, Charles A. Powers—302
A Comparative Evaluation of He-Ne Lasers, Tung H. Jeong—181
Constant-Volume Sound Source, William A. Bell and William M. Keller—406
Damped Simple Harmonic Motion on a Linear Air Track, Thomas B. Greenslade, Jr.—395
Damped Oscillations, Zenon Gubanski—59
Effect of Variable Frequencies on Reactive Circuits, David D. Lockhart—59
Energy and Momentum during an Interaction, Edward J. DeYoung—168
Floor and Table Protector, Alfred M. Eich, Jr.—345
The Force Table as a Computing Device, Seymour Charas—49
Grating With Two Slits for Two Cents, Lester Dwyer—512
Images from a Piece of a Lens, Samuel Hirschman—246
An Improved Inclined Plane for Introductory Physics, T. G. Bullen, C.F.C.—167
Improved Regularity Ticker Tape Timers, Dennis L. Hoeppner—60
Interference of Light Coming From an Air Wedge, Zenon Gubanski—455
Lossy Collisions: An Air Track Experiment, John L. Stull—225
Making Inexpensive Accessories for Nuclear Education, John W. Sulcoski—300
Mechanical Hysteresis with Inexpensive Equipment, Henry A. Garon—100
Modern Methods for the Study of Optical Diffraction, Roy H. Biser—158
An Oft Forgotten Formula, Noel C. Little—452
Qualitative Demonstrations and Experiments Using Liquid Nitrogen, R. G. Hunt and G. L. Salinger—289
Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part I: Something About the Orbits, H. R. Crane—209
Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part II: Equipment and Results, H. R. Crane—285
A Simple Measurement of the Heat of Vaporization of Liquid Nitrogen. P. A. Knutson and G. L. Salinger—288
Spinthariscopes, James J. Barker—244
Student Projects in Physics, Robert E. Chesley—449
Two Electroscopes Are Better Than One, Marvin Ohriner and Steve Machtinger—343
X-Ray Hazards, James G. Terill, Jr.—127

Astronomy and Astrophysics

Ammonia Molecules Discovered in Space, Ray Colvig—419
Binary Stars and Light Curves, Alan L. Breitler—453
Nova-Like Behavior of the X-Ray Source Centarius XR-2, Hans Mark—61
Origin of the Elements, William Stephens 431
Our Universe: The Known and the Unknown, John A. Wheeler—24
Quasars as Protogalaxies, James Paul Wesley—348
Physics of Comet Tails, John C. Brandt—61
Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part I: Something About the Orbits, H. R. Crane—209
Space Based Detection of Radiations from Nuclear Detonations, R. F. Taschek—464

Atomic and Molecular Physics

Electric Field Stops Flow of Superfluid, Bob Holcomb—119
Magnitude of Electronic Charge, Mario Iona—302
Physics and High Polymers, Richard K. Quynn—213
Preferential Discharge of Negatively Charged Bodies by Certain Incandescent Wires or, The Case of the Overachieving Quanta, Richard S. Siegel—226
X-Ray Hazards, James G. Terill, Jr.—127

Awards

1969 AAPT Awards—230
A Decade of the AAPT High School Awards Program, Robert A. Reitz—35
Luis Alvarez, Nobel Prize for Physics—292

A New Award Program for Secondary School Physics Teachers—Cash Awards for Innovative Teaching, Arnold Strassenburg—257

Biophysics

DNA, RNA and the Physical Basis of Life, Peter Fong—385

Book and Film Lists

Resource Letter ColR-1 on Collateral Reading for Physics Courses, Alfred M. Bork and Arnold B. Arons—330

Book and Film Reviews

The Atomists (1805-1933), Basil Schonland. Reviewed by Stephen G. Brush—171

Basic Tables in Physics, John Robson. Reviewed by Reuben Benumof—111

The Collected Papers of Enrico Fermi, Vols. I and II, Emilio Segré, Ed. Reviewed by Lester G. Paldy—470

Completeness In Science, Richard Schlegel. Reviewed by Kemp Bennett Kolb—56

The Development of Physical Theories, J. Gordon Stipe, Jr. Reviewed by Paul Bartunek—411

Discovery in Physics, Leonard Greenberg. Reviewed by Kemp Bennett Kolb—108

Essentials of Physics, Herman Gewirtz. Reviewed by Norman C. Rone—112

The Fabric of the Atom—An Introduction to Quantum Mechanics, Philip Morrison. Film review by Gerald Wendt—407

Fundamentals of College Physics and Laboratory Experiments in Physics, W. Wallace McCormick. Reviewed by George Freier—240

The Graphic Work of M. C. Escher, M. C. Escher. Reviewed by Lester G. Paldy—351

Inside the Orbit of the Earth, Willy Ley. Reviewed by T. Page—504

Introduction to the Meaning and Structure of Physics, Leon N. Cooper. Reviewed by Herbert Priestley—295

Know Your Sweep Generators, Robert G. Middleton. Reviewed by Samuel A. Marantz—296

Light and Radiation, Ira M. Freeman. Reviewed by Alexander Efron—498

M. C. Escher's Drawings (35 mm slides), M. C. Escher. Reviewed by Lester G. Paldy—452

Mathematics for Physical Science, Bill Aldridge. Reviewed by Richard A. Marble—174

Mathematics in the Modern World, readings from *Scientific American*. Reviewed by Lester G. Paldy—238

Mechanical Man, the Physical Basis of Intelligent Life, Dean E. Wooldridge. Reviewed by Isaac Asimov—55

Mechanics, Molecular Physics, Heat and Sound, Robert Millikan, Duane Roller and Charles Watson. Reviewed by Thomas Miner—468

Microscopy, F. K. Moellring. Reviewed by W. W. Aschoff—501

Modern Physics, Williams, Metcalfe, Trinklein, and Lefler. Reviewed by Noel C. Little—295

Motivations, Tools and Theories of Pre-Modern Science, Mark Graubard. Reviewed by Richard Mason—239

Music, Physics and Engineering, Harry F. Olson. Reviewed by Jess J. Josephs—238

The Origin and Evolution of the Universe, E. Schatzman. Reviewed by Donald G. Rea—176

Our Present Knowledge of the Universe, Sir Bernard Lovell. Reviewed by Stephen P. Maran—502

Particle Physics, the High Energy Frontier, M. Stanley Livingston. Reviewed by Edward H. Thorndike—237

Physics Experiments for Children, Muriel Mandell. Reviewed by Edmund Bray—501

Red Giants and White Dwarfs: The Evolution of Stars, Planets, and Life, Robert Jastrow. Reviewed by Fred Schubert—111

Quantum Electronics, John R. Pierce. Reviewed by Thomas D. Rossing—112

The Riddle of Gravitation, Peter G. Bergmann. Reviewed by Matthew P. Thekaekara—53

Saunders Short Tables, Mathematical and Physical Tables for Students, R. Stevenson. Reviewed by Reuben Benumof—111

Science and the Educated Man, Julius A. Stratton. Reviewed by H. Bentley Glass—107

The Science of Chemistry, Ira M. Freeman and A. Rae Patton. Reviewed by Robert Gardner—503

Scientific Study of Unidentified Flying Objects, Daniel S. Gillmor, Ed. Reviewed by Melba Phillips—350

A Short Textbook of Physics, W. H. Westphal. Reviewed by H. L. Armstrong—410

The Social Function of Science, J. D. Bernal. Reviewed by Arthur I. Rothman—414

Sound and Ultrasonics, Ira M. Freeman. Reviewed by Alexander Efron—498

Stars and the Universe, David Dietz. Reviewed by Peter Kahn—503

Statistical Treatment of Experimental Data, Hugh D. Young. Reviewed by Arthur I. Rothman—108

The Way of the Scientist, Editors of INTERNATIONAL SCIENCE AND TECHNOLOGY. Reviewed by Alan H. McGowan—173

The Winds; The Origins and Behavior of Atmospheric Motion, George M. Hidy. Reviewed by John A. Day—297

Computers

Computers in the Physics Curriculum, Ronald Blum—339

The Force Table as a Computing Device, Seymour Charas—49

The Snail Problem Revisited, Geoffrey I. Gleason and Buford M. Guy—294

Teaching ac Circuits with the Aid of a Computer, T. G. Bullen, C.F.C.—290

Courses

Giving Relevance to Science, Lawrence V. Parsegian—379

Improving the First Encounter With Physics, Edward H. Leonard—510

Interdepartmental Team Teaching—A Physics-Math Course, J. L. Dunlap and A. P. Alberding—163

NSF Summer Institutes—51

A New Approach to Physics Instruction, Carl Naegele—45

The Open Physics Laboratory, Bill G. Aldridge and Paul Feldker—321

The PSSC Advanced Topics Tests, John H. Dodge—337

A Partially Learner-Paced Approach to Teaching PSSC Physics, John W. Ashenfelter—93

Physics for the Slow Track High School Student, Florence Freilich—99

Problems for Introductory Physics, H. R. Crane—371

The Role of History in the Teaching of Physics, Stephen G. Brush—271

The Status of the One-Year Noncalculus Physics Course in California Colleges, S. George—445

University Research Programs for Inner City High School Students, Leonard O. Roellig, Alvin M. Saperstein, and Melbourne G. Stewart—137

Editorials

The Bomb—A Proper Subject!, Lester G. Paldy—479

Clever Hans, The Perceptive Student, Clifford E. Swartz—311

The Flight from Science—A Student's View, Katherine Swartz—195

The Hawthorne Effect and Other Mysteries, Clifford E. Swartz—429

A Model World, Clifford E. Swartz—11

The Need for Physics Training in a World of Change, Glenn T. Seaborg—74

A New Award Program for Secondary School Physics Teachers—Cash Awards for Innovative Teaching, Arnold Strassenburg—257

A New Career Pattern?, Lester G. Paldy—369

Trends In Physics Education, Stanley S. Ballard—132

Education

The Author Replies, Charles Jacob—310

A Brighter Future in Science Education, Willard Jacobson—439

Clever Hans, The Perceptive Student, Clifford E. Swartz—311

The Continuing Education of Physics Teachers, Melba Phillips—88

A Decade of the AAPT High School Awards Program, Robert A. Reitz—35

Enrichment Opportunities for High School Teachers and Students, Peter Thompson—396

Factors Contributing to the Enrollment of Physics Majors at Washington State University, Frederick Schultz—508

The Flight from Science—A Student's View, Katherine Swartz—195

Giving Relevance to Science, Lawrence V. Parsegian—379

Graphite Reactor: Nuclear Landmark Opened to Public, Carl K. Tipton—228

Interdepartmental Team Teaching—A Physics-Math Course, J. L. Dunlap and A. P. Alberding—163

A Master Teacher, Lester G. Paldy—39

More on Physics Enrollment, Winston E. Cleland—71

NSF Grants $9 Million to Improve Secondary School Science and Math Teaching—50

NSF Summer Institutes—51

The Need for Physics Training in a World of Change, Glenn T. Seaborg—74

A Neighborhood Science Center, Leonard S. Rodberg—281
A New Approach to Physics Instruction, Carl Naegele—45
A New Award Program for Secondary School Physics Teachers — Cash Awards for Innovative Teaching, Arnold Strassenburg—257
On Models, Ralph A. Evans—225
The Open Physics Laboratory, Bill G. Aldridge and Paul Feldker—321
A Partially Learner-Paced Approach to Teaching PSSC Physics, John W. Ashenfelter—93
Physics for the Slow Track High School Student, Florence Freilich—99
Physics — Phooey? (Letter to the Editor), Alexander Efron—191
The Role of History in the Teaching of Physics, Stephen G. Brush—271
The Robert Andrews Millikan Lecture, AAPT, 1968: Artistic Invitations to the Study of Physics, Alan Holden—259
Trends in Physics Education, Stanley S. Ballard—132
The Units of "Increment," Arthur G. Rouse—169
University Research Programs for Inner City High School Students, Leonard O. Roellig, Alvin M. Saperstein, and Melbourne G. Stewart—137
What is Science?, Richard P. Feynman—313

Electricity and Magnetism

Effect of Variable Frequencies on Reactive Circuits, David D. Lockhart—59
Electric Field Stops Flow of Superfluid, Bob Holcomb—119
Electrical Conduction in Solids, Donald Long—264
Electrostatics Demonstrations, Robert P. Lanni—313
Magnitude of Electronic Charge, Mario Iona—302
Making an Electric Field Visible with $KMnO_4$ Crystals, Michael Bernstein—301
More on Internal Resistance, Robert P. Lanni—7
An Oft Forgotten Formula, Noel C. Little—452
Qualitative Demonstrations and Experiments Using Liquid Nitrogen, R. G. Hunt and G. L. Salinger—289
Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part II: Equipment and Results, H. R. Crane—285
Safety in the Laboratory—Electricity—505
A Simple Measurement of the Heat of Vaporization of Liquid Nitrogen, P. A. Knutson and G. L. Salinger—288
Teaching ac Circuits with the Aid of a Computer, T. G. Bullen, C.F.C.—290
Two Electroscopes Are Better than One, Marvin Ohriner and Steve Machtinger—343

Electronics

Oscilloscope Display of Current–Voltage Curves, M. Camden—406

Films

Additions to AEC Film Distribution List, Robert Lillich—462
The Fabric of the Atom—An Introduction to Quantum Mechanics, Gerald L. Wendt—409
Film-Making Aids—516
New AEC Film — Transuranium Elements—400
New Filmstrips, Robert Lillich—516

Fundamental Particles

Are There Faster Than Light Particles?, Michael N. Kreisler—391
The Hunting Of The Quarck, Theodore Melnechuk—415
Neutrino Scattering—Nucleon or Nuclear?, T. B. Novey—419
Search for the Neutron Electric Dipole Moment by a Scattering Experiment, C. G. Shull—417
A Search for Stable Quarks, David M. Rank—348

Geophysics

Demonstrations in Physics from Oceonography and Meteorology, K. L. Warsh—327
A Life of Snow, Daisuke Kuroiwa—13
Old Faithful Geyser, John S. Rinehart—221

Gravitation

Mach's Principle and General Relativity, Jeffrey M. Cohen and Marion D. Cohen—241
Our Universe: The Known and the Unknown, John A. Wheeler—24

Harvard Project Physics

The Role of History in the Teaching of Physics, Stephen G. Brush—271

History and Biography

James Prescott Joule and the Quiet Revolution, E. Scott Barr—199
A Master Teacher, Lester G. Paldy—39
The Role of History in the Teaching of Physics, Stephen G. Brush—271

International Physics Education

U.S. Government Grants to Teach and Attend Summer Seminars Abroad. 1970-71—384

Light

The Bicycle Fender Spectrometer, Roy H. Biser—405
A Comparative Evaluation of He–Ne Lasers, Tung H. Jeong—181
Dispersion and Inversion, Samuel Hirschman—116
Grating With Two Slits for Two Cents, Lester Dwyer—508
Images from a Piece of a Lens, Samuel Hirschman—246
Interference of Light Coming From An Air Wedge, Zenon Gubanski—455
Large Scale Demonstration of the Minimum Angle of Deviation, Wallace A. Hilton—509
Modern Methods for the Study of Optical Diffraction, Roy H. Biser—158
The Psychedelic Student-Getter, William R. Franklin—227
Sound on a Light Beam, William M. Zeitz and Terrence P. Toepker—301

Mathematics

The Snail Problem Revisited, Geoffrey I. Gleason and Buford M. Guy—294

Measurement

Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part II: Equipment and Results, H. R. Crane—285

Mechanics

Air Rockets, W. M. Martin—453
Bernoulli's Principle on a Grand Scale, Glenn F. Powers—116
Conservation During Collisions, Andrew Ahlgren—396
Energy and Momentum during an Interaction, Edward J. DeYoung—168
An Experience in Observation, Merle Fisher—166
An Extension of the Second Law of Thermodynamics, Lyle B. Borst—349
A Flight to Reality, Robert E. Chesley—291
The Force Table as A Computing Device, Seymour Charas—49
An Improved Inclined Plane for Introductory Physics, T. G. Bullen, C.F.C.—167
Improved Regularity Ticker Tape Timers, Dennis L. Hoeppner—60
Inertia (Author reply), Alfred M. Eich, Jr.—457
Is Momentum Really Conserved?, Mario Iona—192
Longitudinal Standing Waves on the Overhead Projector, Harald C. Jensen—115
Lossy Collisions: An Air Track Experiment, John L. Stull—225
Mach's Principle and General Relativity, Jeffrey M. Cohen and Marion D. Cohen—241
Mechanical Hysteresis with Inexpensive Equipment, Harry A. Garon—100
Polar Bear Paradox, I. W. Chatham—48
Range of a Projectile, Alfred M. Eich, Jr.—116
Reception of Pictures from the Weather Satellites Using Homemade Equipment. Part I: Something About the Orbits, H. R. Crane—209
Rocket Engine Analog, Robert F. Coutts—407
A Stir About Convection Currents, Marvin J. Pryor—398
The Time of Ascent and Descent of a Vertically Thrown Object in the Atmosphere, Kalman B. Pomeranz—507

Multi-Media Aids

Additions to AEC Film Distribution List. Robert Lillich—516
Film-Making Aids—512
Multi-Media Aids, Robert Lillich—57, 105, 179, 234, 298, 516
New Filmstrips, Robert Lillich—516
Offbeat Reading (Science-Art-Poetry), Robert Lillich—400

Nuclear Physics

Diffraction Theory of Nuclear Collisions,

Roy J. Glauber—118
Graphite Reactor: Nuclear Landmark Opened to Public, Carl K. Tipton—228
Hydrogen Bomb Space Ship Possible—183
Luis Alvarez, Nobel Prize for Physics—292
Making Inexpensive Accessories for Nuclear Education, John W. Sulcoski—300
The Optical Model of the Nucleus, H. H. Barschall—481
Origin of the Elements, William Stephens—431
Spinthariscopes, James J. Barker—244

Optics (see Light)

Particles

Hydrogen Bomb Space Ship Possible—183
Our Universe: The Known and the Unknown, John A. Wheeler—24
Polarized Gamma Rays from Back-Scattered Laser Light, Richard H. Milburn—62
The Streamer Chamber, David Yount—77
Time Reversal Tests in Electromagnetic Transitions, Hans Frauenfelder—119

Projection Pointers

Quick on the Draw, Francis S. Lestingi—514
Projected Plum Pudding or a Thomson Model, Francis S. Lestingi—346
Production, Print and Position, Francis S. Lestingi—459
Transparencies in Living Color, Francis S. Lestingi—402

Quantum Mechanics

Specific Heat Capacity—A Quantum Explanation, Francisco Glover—149

Solid State Physics

Electrical Conduction in Solids, Donald Long—264
Specific Heat Capacity—A Quantum Explanation, Francisco Glover—149

Sound

Constant-Volume Sound Source, William A. Bell and William M. Keller—406
The Psychedelic Student-Getter, William R. Franklin—227
Seeing the Science of Sound, Brother Shamus Mahoney—246
Sound on a Light Beam, William M. Zeitz and Terrence P. Toepker—301

Testing

The College Board Physics Achievement Test, Raymond E. Thompson and Guenter Schwarz—143
Get the Bugs Out of Grades, Sherry J. Gillespie—340
The PSSC Advanced Topics Tests, John H. Dodge—337
Resource Letter AT-1 on Achievement Testing, Haym Kruglak—490

Waves

Damped Oscillations, Zenon Gubanski—59
Demonstrations in Physics From Oceanography and Meteorology, K. L. Warsh—327
Longitudinal Standing Waves on the Overhead Projector, Harald C. Jensen—115
Quick on the Draw, Francis S. Lestingi—514
Two-Source Interference Transparency, David P. Koch—103

AUTHOR INDEX TO VOLUME 7

Ahlgren, Andrew. Conservation During Collisions—396
Alberding, A. P. (with Dunlap, J. L.), Interdepartmental Team Teaching—A Physics-Math Course—163
Aldridge, Bill G. (with Feldker, Paul). The Open Physics Laboratory—321
Armstrong, H. L. Review of W. A. Westphal, *A Short Textbook of Physics*—410
Arons, Arnold B. (with Bork, Alfred M.). Resource Letter ColR-1 on Collateral Reading for Physics Courses—330
Aschoff, W. W. Review of F. K. Moellring, *Microscopy*—501
Ashenfelter, John W. A Partially Learner-Paced Approach to Teaching PSSC Physics—93

GEORGE

By George Freier

Physical science teacher, experienced, desires position in physics, chemistry, and/or earth sciences. At Junior College or secondary level. MS +60. Will relocate. **Reply Box #1269C, THE PHYSICS TEACHER, 335 E. 45th St., New York, N. Y. 10017.**
